SUBMISSION DECK

ROUND 1 — ONLINE PPT
LIVE EVAL — 5 MINUTES
23–24 JAN 2027 — OFFLINE HACKATHON

PRAVEGA.

EVIDENCE-VERIFIED PLACEMENT INTELLIGENCE

ONE PROFILE · ONE TRAIL · EVERY DECISION EXPLAINED

Self-declared skills become evidence-gated verified states. AI drafts; the officer decides. Every action appends to an audit trail — for college Training & Placement cells.

3/3
GOLDEN FLOW PASSING — PLAYWRIGHT

₹0
INFRASTRUCTURE AT PILOT SCALE

LIVE
REPO · README · CI — PUBLIC NOW

THE PROBLEM — PLACEMENTS RUN ON UNVERIFIABLE CLAIMS

PROBLEM

56.35%

of graduates are “employable” — and no employer can tell you WHICH.

11.2%

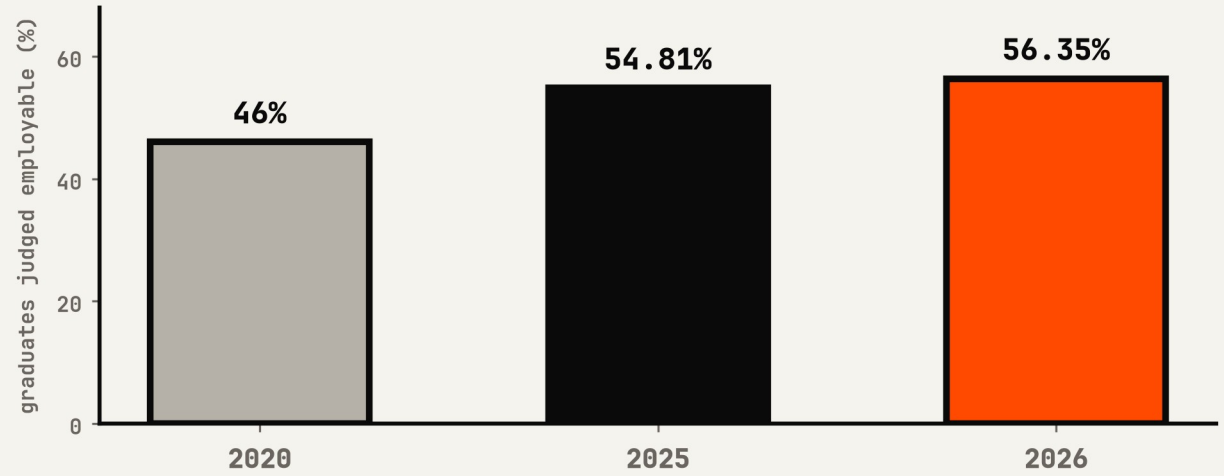

graduate unemployment — about 3× the national rate

42.6%

judged industry-ready on a stricter lens (2025)

MATCH, NOT VOLUME — THE PS'S OWN WORDS

GRADUATE EMPLOYABILITY — INDIA (%)

Wheebox ISR trend · PIB (Jul 2026) records the same rise from 46% (2020) — docs/research-brief.md

THE COST OF CLAIMS — TODAY

Placements on gut
T&P filters in spreadsheets — no version, no appeal, no audit

Evidence orphaned
repos & tests exist but never become trusted skill state

Training reacts, never predicts
cohort weakness surfaces only after a failed drive

NAAC outcomes by hand
numbers live in Excel — nothing traces back to an action

Sources: Wheebox India Skills Report 2026 · PIB (Jul 2026) · PLFS 2025 · Graduate Skill Index 2025 — DOCS/RESEARCH-BRIEF.MD

THE GAP — WHAT EXISTS VS WHAT'S MISSING

LANDSCAPE

EVERY TOOL DIGITISES THE QUEUE.

NONE VERIFIES THE PERSON.

CAPABILITY	SUPERSET	TCS iON	LINEUPX	SPREADSHEETS	PRAVEGA
Campus logistics — post, apply, schedule	✓	✓	✓	✓	✓
Evidence-gated skill states, expiry-tracked	—	—	—	—	✓
Explainable eligibility — versioned rules	—	—	—	—	✓
AI drafts; human approves / overrides	—	—	—	—	✓
Append-only audit for NAAC / NIRF	—	—	—	—	✓
Appeal path on every decision	—	—	—	—	✓

40% vs 10%

of new backend JDs ask Docker — 10% of the batch has it (PS)

61%

of recent backend JDs ask SQL — our own cohort data (db/seed.ts)

THE SOLUTION — ONE LINE, THREE ACTS

SOLUTION

CLAIMS IN. EVIDENCE OUT. A HUMAN ON THE FINAL SWITCH.

STATE
CLAIMED
self-declared — nobody checked

→

EVIDENCE GATE
REPO → ANALYZER
language bytes · commit cadence · test presence

→

✓ VERIFIED
expiry-tracked · evidence chain cited

I Evidence over claims

— GitHub scan — language bytes, cadence, tests

— Claimed → Verified flip, expiry tracked

— Every flip cites its evidence chain

LEDGER · ANALYZER

II The number moves

— Mock drive flags the weak skill

— Learning-path tasks produce real evidence

— Retest delta shows growth — not vibes

GAP ENGINE · PATH BUILDER

III AI helps, human decides

— Agents draft sets, sweeps, schedules

— Officer approves or overrides — reason mandatory

— Every action → append-only audit + fairness scan

AGENT RUNS · AUDIT LOG

ONE PROFILE · ONE TRAIL · EVERY DECISION EXPLAINED — THE PRODUCT IN A SINGLE LINE

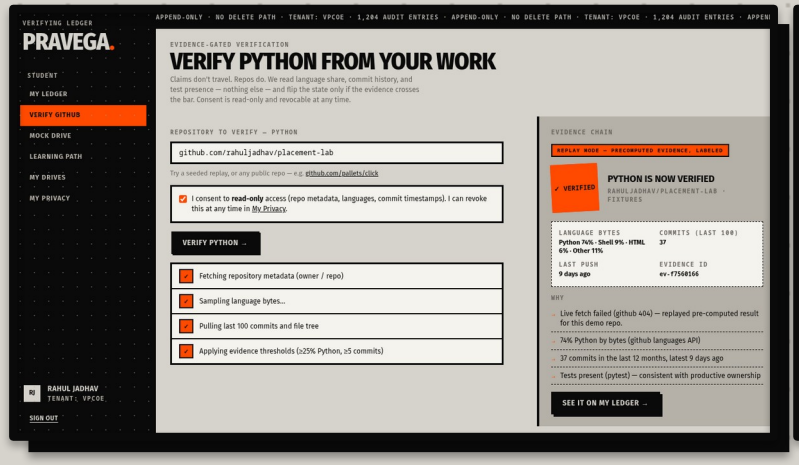

PS PILLARS: EVIDENCE-BASED COMPETENCY PROFILING · SKILL-GAP BRIDGING · AGENTIC PLACEMENT INTELLIGENCE · GOVERNANCE & TRUST — DOCS/ROUND1-FACTS.MD

PROOF — THREE ACTS OF WORKING PRODUCT

DEMO

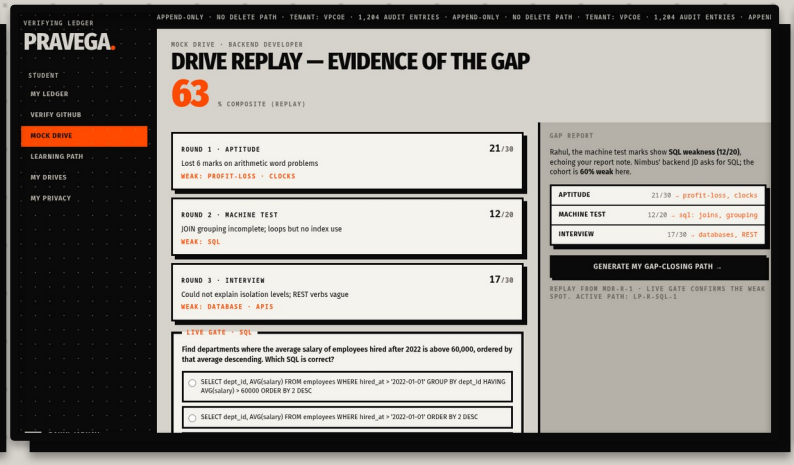

THIS IS NOT A MOCK. EVERY SCREEN EXISTS.

Replay-labeled proof — the analyzer says so on screen, never silently.

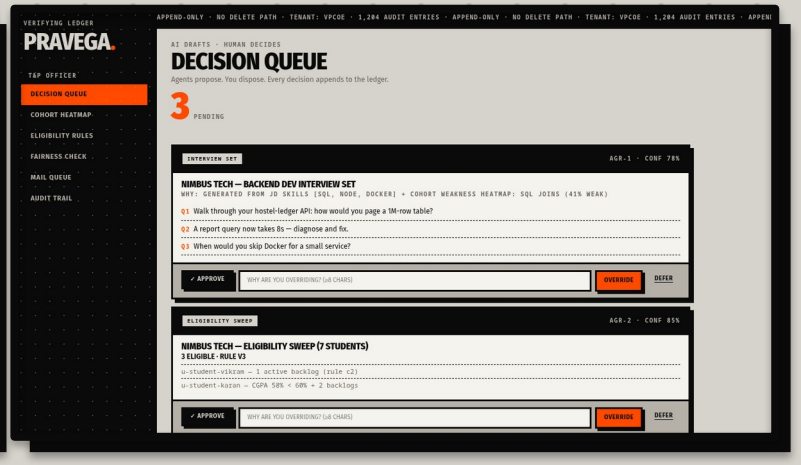

ACT I — CLAIM FLIPS TO VERIFIED

Python 74% language bytes · 37 commits · tests found — evidence chain logged, replay labeled

ACT II — GAP NAMED, PATH ASSIGNED

Aptitude 21/30 · machine 12/20 · interview 17/30 → 63% composite; cohort 60% weak in SQL

ACT III — AI PROPOSES, HUMAN DECIDES

3 proposals pending · approve / override (≥8 chars) / defer · rule v3 · conf 78% / 85%

REPLAY MODE IS LABELED ON SCREEN — A FAILED LIVE FETCH NEVER HIDES

GOLDEN FLOW 3/3 E2E

PUBLIC URL — SHIPS WITH SUBMISSION

SEED: 7 STUDENTS · FULL EVIDENCE CHAINS

Fixtures ↔ live: the analyzer's ports/adapters keep the demo alive when venue Wi-Fi lies — same evidence chain, labeled.

Screenshots: docs/screenshots/brutalist-{verify,mockdrive,officer-queue}.png — captured from the running app, 2026

ENGINEERING — NO BLACK BOXES

HOW IT WORKS

HONEST PIPELINE. EVERY STEP TRACES.

Deterministic agents with reason codes — no LLM on the critical path.

1

GitHub, read-only

Consent explicit + revocable. Metadata, languages, commits — nothing else.

PORT / ADAPTER

2

Analyzer

Language bytes · cadence · tests. Fixtures ↔ live — every fallback labeled.

LABELS REPLAY

3

Evidence ledger

Postgres + Drizzle. Expiry-tracked states, append-only events.

SUPABASE AP-SOUTH-1

4

Rules engine

Versioned clauses, parse-free — no eval(). Rule v3 history recorded.

EXPLAINABLE

5

Human gate

Agents draft; officer approves or overrides with a mandatory reason.

AUDIT_LOG

STACK — BORING, PROVEN

NEXT.JS 16 | REACT 19 | TYPESCRIPT 5 | TAILWIND V4 | DRIZZLE ORM | POSTGRES · SUPABASE | PLAYWRIGHT 3/3 | GITHUB REST

CLEVER, NOT MAGIC

Analyzers are ports/adapters — swap fixtures ↔ live GitHub with zero changes above the ledger. A failed fetch replays precomputed evidence, labeled on screen — never silent.

tenant_id on every row · data residency: Supabase ap-south-1 (Mumbai) · the PS explicitly allows rule-based AI — we ship that, and we say which is which.

FEASIBILITY & COST — BORING WINS

FEASIBILITY

₹0 INFRASTRUCTURE.

Free tiers end to end. Nothing experimental on the critical path.

₹0
INFRA AT PILOT — FREE TIERS

36 H
SOLO BUILD · BORING STACK

NO ML
RULE-BASED AI — PS ALLOWS IT

0
HIGH/CRITICAL NPM-AUDIT FINDINGS

WHAT BREAKS	WHAT WE DO
Venue network dies	Labeled fixture replay + recorded 90s video — the demo never freezes
GitHub rate-limits or 404	GITHUB_TOKEN supported; demo repo 404s — replay carries, honestly labeled
“AI could hallucinate” critique	No LLM on the critical path — deterministic rules + human gate; confidence shown
Students won't connect repos	Consent explicit & revocable; lab work, contests, certificates accepted
Judges break the demo link	Officer-only demo reset — factory reseed in seconds
Scale beyond one college	tenant_id on every row; NAAC export is one CSV; PS multi-tenant path intact

Pilot math: free tiers, one branch, no ML required — the PS says rule-based is allowed, and we say so out loud.

Costs & risks: DOCS/ROUND1-FACTS.MD · DOCS/SECURITY-NOTES.MD · README.MD (npm audit: 0 high/critical)

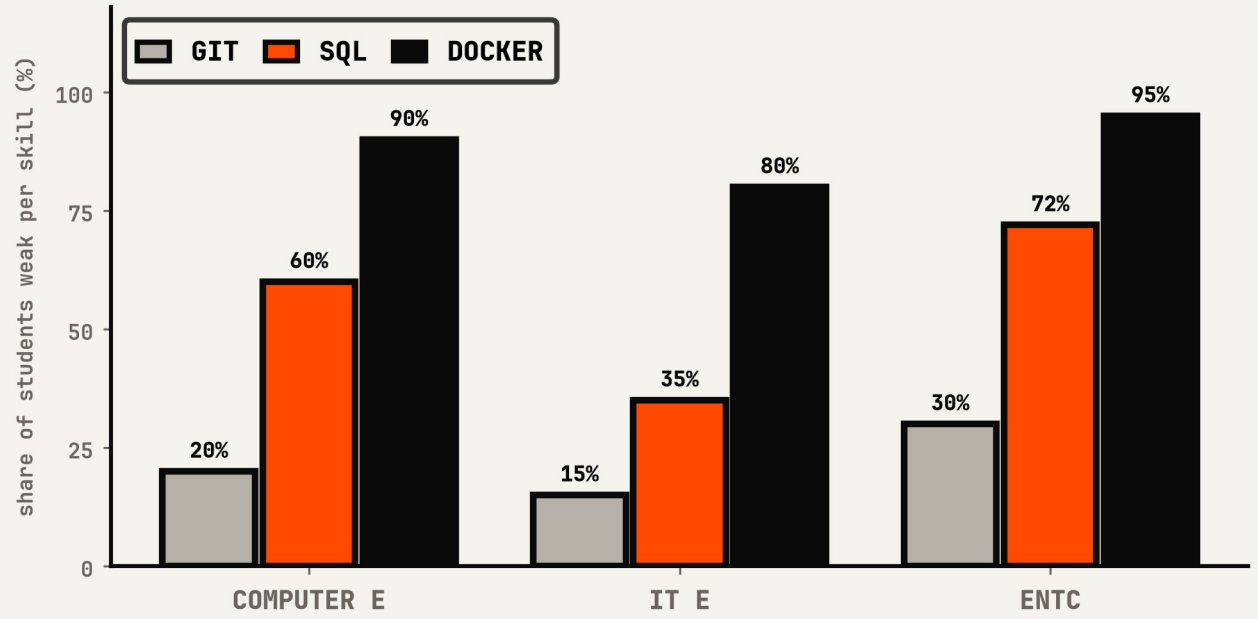

EXPECTED OUTCOMES — THE NUMBER THAT MATTERS

IMPACT

THE NUMBER MOVES — MEASURED, NOT VIBES.

+8–15 pp

COHORT WEAK SHARE BY BRANCH (%)

measured from mock drives + verified evidence — db/seed.ts

60%

of the CompE batch is weak in SQL — the backend bottleneck (61% of JDs ask it)

64–78%

placement rate across branches today — the baseline the pilot moves (db/seed.ts)

NAAC / NIRF → CSV

the heatmap exports straight to the accreditation template — no manual collation

SIGNAL: SQL IS THE BOTTLENECK — ONE WORKSHOP, THEN GATE THE DRIVE ON THE RE-TEST

Cohort data: db/seed.ts (analytics + mock-drive replay) · target framing: DOCS/ROUND1-FACTS.MD

PILOT FIRST. CREDENTIALS LAST.

PHASE 1 — FEB

PILOT AT VPPCOE T&P

One branch, live drives, measured before/after — the proof batch.

PHASE 2

MULTI-BRANCH COHORTS

Heatmaps across branches; workshops targeted by weak-share evidence.

PHASE 3

RECRUITER ONBOARDING

Evidence-first discovery — every match shows why, with the packet.

PHASE 4

VERIFIABLE CREDENTIALS

Open Badges 3.0 shape — tamper-evident, portable skill records.

OFFLINE HACKATHON: 23–24 JANUARY 2027 — WE BUILD THE FULL THING LIVE IN 36 HOURS

- PUBLIC URL + GITHUB + README — SHIPS WITH SUBMISSION
- DEMO VIDEO ≤ 90S RECORDED — NEVER DEAD AIR
- 5-MINUTE SCRIPT — SPEAKER NOTES ON EVERY SLIDE

Scope is managed, not hoped: trigger cuts are documented in advance — depth on the golden flow beats breadth everywhere.

THE ASK

ASK

SELECT US.

WE SHIP THE FULL BUILD LIVE IN THE 36 HOURS.

Round 1 selects the offline hackathon — 23–24 January 2027.

- Repo live now — github.com/Siddhesh-ai-del/pravega
- Deploy target: public URL ships with the submission packet
- Demo replays labeled proof if the network lies — never dead air
